 PATENTS PENDING.

TODAY'S CANOPIES

Slide on wire canopies have become a common part of modern outdoor design for their simplicity, beauty and ability to provide shade when needed and retracted easily when desired. However, they have many draw backs because they are custom made. To fit properly they require precise pre-measurement, fabric and color selection, weeks of fabrication and finally installation. Once installed the custom canopies can't be modified and any repairs (if possible) require a trip back to the shop.

CANOPIE REINVENTED

The patent pending Infinity Canopy replaces the custom and rigid slide on wire canopy with an infinitely versatile, customizable and adaptable shade system. Using readily available parts and shade panels Infinity Canopy eliminates production time, simplifies installation and provides a superior product at a fraction of custom canopy's cost. Infinity Canopy is the only shade system that can be modified after installation. New and unique designs can be created within minutes to meet any taste, style and need.

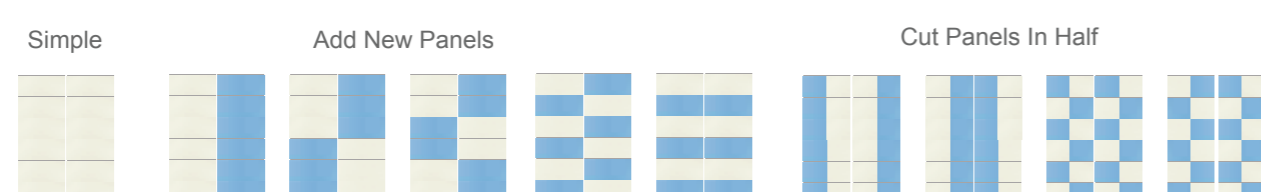

INFINITE SHADE

As long as over head support is available Infinity Canopy can be made to be as long and as wide as needed. Individual sections can be connected back to back to increase the length of the canopy and multiple canopy sections can be installed side by side to cover the desired space.

Alternatively individual sections can be connected end to end to create wider canopy sections. For very long and wide installations, the canopy can connect to additional cables for proper support

INFINITE DESIGNS

Keep it simple with a single colored canopy or create stunning designs using different colored shade panels. Replace panels in minutes to match your new furniture, celebrate with your favorite team's colors, show your patriotism or get in to the holiday spirit. Need more options? Panels can be cut for even more designs.

INFINITE POSSIBILITIES

Infinity Canopy's unique modular design provides endless possibilities that can't be replicated by any other shade system such as,

- Create a single or multi colored canopy.
- Change the color and design of an installed canopy.
- Open and close the canopy from either direction.
- Control the flatness and bowing of each panel.
- Add vertical panels for additional shade and privacy.
- Remove panels to create open and shaded sections.
- Attach the canopy to cables or directly to ceilings or support beams
- Add or remove panels to change the size of the canopy.
- Connect canopy sections end to end to widen the canopy.
- Cut the profiles and panels to reduce the width of the canopy.
- Install indoors to cover unfinished ceilings, rafters and air ducts.
- Remove and reinstall for cleaning, repairs and within minutes.

INFINITY HARDWARE

The structural components of Infinity Canopy are made from the highest quality marine grade stainless steel and anodized aluminum to provide years of high performance under the harshest conditions. Each part is unique and specifically engineered to provide multiple functions and install easily without special tools.

Infinity Canopy's turnbuckle has been specially designed to connect directly to both ends of the same cable eliminating the need for pre measured cables or swaging. The result is an easy to install turnbuckle with a clean and modern finish that can withstand at least 2000 lbs. of force.

Infinity Canopy's hook and base instantly attach or detach the canopy to the cables and slide easily for a smooth movement. The hook can turn 90 degrees to lock the canopy to crossing cables and along with the base be used to connect two canopy sections end to end to increase the width of the canopy.

Infinity Canopy's aluminum profile is the center piece of the system. It is strong, light weight and has multiple channels to hold the canopy's components together. For long canopies multiple hook and base pairs can attach anywhere along its length allowing connection to multiple cables. The profile holds the panels securely yet allowing the panels to be installed and replaced within minutes.

INFINITY SOFTWARE

Infinity Canopy's shade panels are made from the highest quality outdoor mesh and canvas fabrics that are exclusively used in the awning industry. They provide optimal shade, beauty and performance yet are resistant to sun damage, mold, and fire. The shade panels are available in a variety of colors providing infinite options to design unique looks and change them at will. They can be easily cleaned to retain and reflect their natural beauty for years to come.

INFINITY WARRANTY

Infinity Canopy parts and panels are backed with our 5 year warranty against defects in materials and workmanship. In addition the shade panels are warranted against color fading and strength loss for a minimum of 5 years.
