All the photos in this catalog are of structures purchased by our customers.

A sincere thank you to all of our customers who graciously shared these beautiful photos with us!

WHAT OUR CUSTOMERS ARE SAYING

I am super impressed with the quality, cuts, and predrills. The whole thing is a work of art. The craftsmanship is off the charts.

Loren Erwin,
Bothell, WA
1/30/2018
26x15 Grand Cedar Pavilion Kit

The kits were delivered in perfect condition, the shipping folks were awesome to work with.

The kits included everything I needed to accomplish the job. The fit and finish was wonderful and consistent.

It took me and 3 other guys to put up all 3 of the pergolas in one weekend. We had no trouble... and none of us have ever done this type of project. The wood is darn sexy, beautiful grain and quality. We chose to just seal it and not put any stain on it.

We have probably gotten 100 compliments, comments and questions on them. Everyone at our parties are amazed we did the work ourselves because of the custom end details and overall engineering.

There is a good chance we will order a 4th one next year. Thanks for having such a well thought out and planned product.

Three Classic Cedar Pergola Kits
i) 12x24, ii) 10x16, and iii) 8x10

We are extremely happy with the pavilion and how it turned out. We've received multiple compliments from neighbors as well. In regards to the assembly, it was easy to follow.

Everything went exceptionally smooth with delivery. We loved the step by step instructions, very easy to put together. Such high quality!! Top notch wood!

I appreciate all of your help and couldn't have been happier with how it looks. My dad has been in construction his whole life and was impressed with the quality of this product.

Jenny

10x14 Vinyl Pavilion Kit

Everyone loves it! It is a wonderful addition to our outdoor pool area, friends have plenty of room to get out of the sun. They love how massive it is and solid.

We could not be happier! Every piece is solid and well made, it's a work of art. We enjoy it almost everyday day, perfect for our home.

Delivery was on time and completed by very nice people. For a pavilion of our size, assembly requires at least 2 people with general knowledge of basic construction skills.

Everything was cut beautifully and we absolutely love it! The instructions were clear and we completed the project in estimated time.

Recommend very highly.

18x18 Grand Cedar Pavilion Kit

We researched pergola kits and pre-built structures for a full year before deciding on Pergola Kits USA. From our first inquiry to the final delivery, we couldn't have been happier. We were building a large structure and had many questions. Fred was so helpful and knowledgeable every step of the way.

My husband built the unit by himself in a little over 2 days. Our unit was 25 x 16 and went up without a hitch. The attention to detail was evident as he assembled the pergola.

Our finished pergola is absolutely beautiful. We have received many comments from friends, family, and neighbors on how beautiful the Pergola looks on our patio. The quality of the product and the beautiful mahogany finish is perfect.

My husband has been a tradesman carpenter for 40 years and said the kit was so well put together and thought out that it practically built itself.

We couldn't be happier!

Serenity Cedar Pergola Kit, Roof-Mounted

Thank you so much for the Great service from the Research through to the delivery. You do not find Great service like this at too many places anymore.

Most places you are just a number. With your company I felt like someone cared and took a professional approach to a business deal. Once again thanks.

10x16 Cedar Pergola Kit

We include all post mounting brackets and hardware with your kit.

Shown: powder coated L-brackets. Request these if you wish to trim your post bottoms yourself.

Shown: stainless steel post mounting bracket anchoring a 6x6 post to concrete.

We pre-mark your rafters to ease assembly.

All kits include pre-assembled post bottom moldings. Shown: Moldings to conceal heavy duty post brackets.

WHY OUR CUSTOMERS LOVE OUR KITS

- **Ready-to-Assemble Kits, Handcrafted to Your Specifications:** At Pergola Kits USA we fabricate to your specs. Want your post centers 10'-4" apart? No problem. Want an extra 8" roof extension on one side? No problem. We fabricate your structure exactly the way you want, and ship it to you as a ready-to-assemble kit.
- **Fully customizable kits:** Choose your exact structure's length, width, and height to fit your patio. Choose the position of your posts to make room for obstacles. Eliminate posts to preserve a view. Choose wider posts, pick your own rafter tail design, add a lattice roof... you name it.
- **Easy Assembly:**
 - Your kit includes a step-by-step assembly manual.
 - Manuals include photos and a description of each step to guide you.
 - Pergola kits arrive pre-marked, pre-cut, and pre-notched.
 - Pavilion kits under 14ft arrive pre-marked, pre-cut, pre-notched, with pre-assembled roof panels.
 - Pavilion kits 14ft or longer arrive pre-marked, pre-cut and pre-notched, but require stick-frame roof assembly (two-page pictorial instructions to guide you), and some cutting of the tongue and groove roof decking.
 - All post base moldings arrive pre-assembled.
 - Approximately half of our customers assemble their kits themselves. Most of the rest hire a local handyman.
 - We offer assembly services in Midwestern and East Coast states. If you live elsewhere we would be happy to provide suggestions on sourcing an assembler in your area.
- **Highest quality material:**
 - Our cedar kits are made entirely of Western Red Cedar #1 Grade, sourced from renewable forests in the State of Washington and Oregon, kiln-dried and finished smooth to the touch.
 - Our structural fiberglass is made in the USA, using the highest quality materials and time-tested fabrication methods.

- Our vinyl pavilions are made of pressure treated timbers SYP #1 grade, faced with Wolf Trim™ high density cellular PVC.
- We proudly source all materials from the USA.

► **Quality Craftsmanship:** Third and fourth generation master carpenters oversee the design and fabrication of your structure, using time-tested methods. We notch your timbers to enhance your structure's appearance, stability, and durability. This eliminates the need for unsightly hardware.

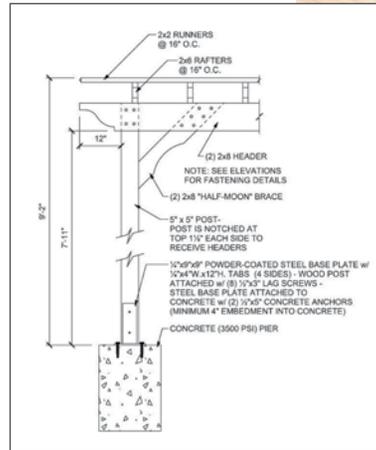

- Posts are notched for beams
- Beams are notched for rafters
- Rafters are notched for top runners

► **Warranty:**

- Our cedar structures carry a 10-year warranty
- Our structural fiberglass structures carry a Lifetime Warranty
- Our vinyl structures carry 10-year warranties

► **Drawings:**

- **Shop drawings:** Before we even begin fabrication, we send you a set of shop drawings. Shop drawings feature several elevation views and plan views. They also detail the size and spacing of all timbers. Review these drawings and let us know if you are happy with them. If not, we will incorporate your requests into your design. You may submit these drawings to your local permitting agency or homeowner's association for approval.
- **Engineer stamped drawings:** Drawings stamped by an engineer licensed in your state are available at market rates. We use an outside engineering firm licensed in all 50 states. This firm is very familiar with our designs and has created thousands (literally) of drawings of our pergola and pavilion kits.

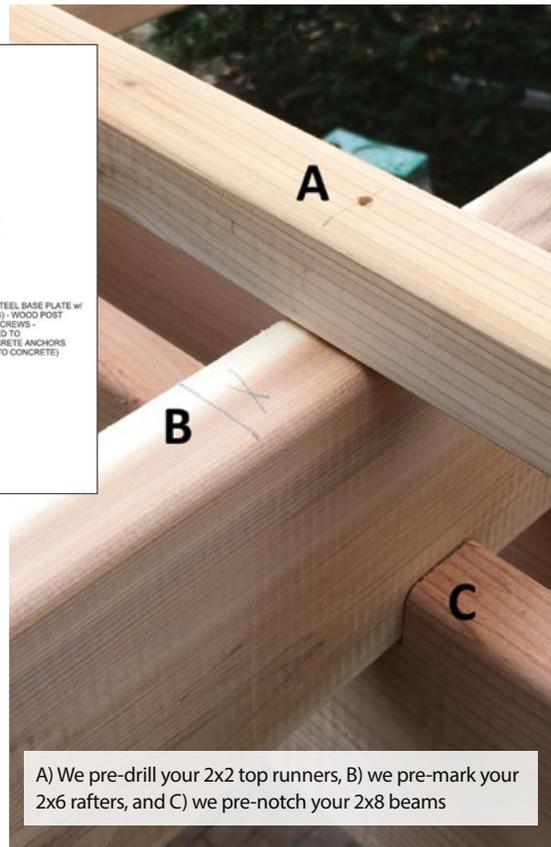

Optional heavy duty post anchors for high wind and seismic areas. Made of quarter-inch thick powder coated steel, these weigh 18 lbs. each

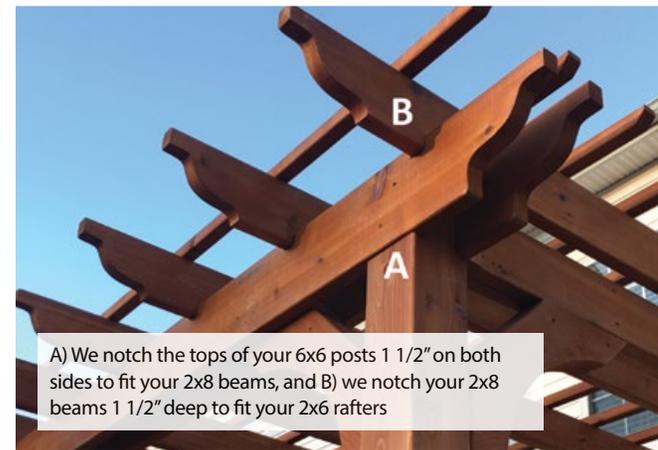

We pre-assemble your post bottom moldings

We notch your 2x4's to fit snugly into your 2x6's

A) We pre-drill your 2x2 top runners, B) we pre-mark your 2x6 rafters, and C) we pre-notch your 2x8 beams

A) We notch the tops of your 6x6 posts 1 1/2" on both sides to fit your 2x8 beams, and B) we notch your 2x8 beams 1 1/2" deep to fit your 2x6 rafters

For pavilion widths less than 14ft, we ship you pre-assembled roof panels
